# Litepaper for Polynetica

Introduction

Polynetica is an innovative project that introduces a comprehensive system for managing contracts and token sales. The project is built on the Polygon blockchain and features a unique tokenomics model and referral system.

Tokenomics

The native token of the Polynetica ecosystem is $POLLY. A total of 100 billion tokens will be issued, with the following distribution:

12% **Presale Tier System:** These tokens are sold through a fair and transparent Tier Sale system.

10% **Public Sale:** These tokens are sold to the public through the official website after the Tier Sale stage.

3% **Partner Bonus Pool:** These tokens are used to provide an instant bonus for partners who help to promote and grow the Polynetica ecosystem.

20% **Team Marketing Pool:** These tokens are used to fund the team's marketing and development efforts.

25% **Dev Pool:** These tokens are used to fund the development of the Polynetica ecosystem.

15% **DEX & CEX Listing (free market):** These tokens are used to list $POLLY on DEX and CEX.

15% **Growth Pool:** These tokens are used to fund the growth of the Polynetica ecosystem through exchange rate support and collaborations with professional traders, market leaders and crypto influencers.

- This allocation ensures that the Polynetica ecosystem has the resources it needs to grow and succeed.

Polynetica

Token Sale Process

The token sale process will be conducted in two phases:

Tier Sale

During the Tier Sale, tokens will be sold exclusively in tiers. A transfer block will be implemented to prevent the token from being listed on exchanges during this period.

Public Sale

The public sale will begin after the completion of the Tier Sale. Tokens will be sold for a range of prices from 0.00008 to 0.0002.

Tier Sale System

The pre-sale will be conducted using a Tier System, with the following features:

Fixed price

Each tier will have a fixed price per token.

Limited supply

A limited number of tokens will be available for purchase in each tier.

Partner rewards

partner rewards will be fixed for each purchase.

During this stage, $POLLY tokens will be sold as follows:

Tier 1   5,000,000 $POLLY
for 176 POL

Tier 2   4,000,000 $POLLY
for 169 POL

Tier 3   3,000,000 $POLLY
for 148 POL

Tier 3   2,000,000 $POLLY
for 127 POL

Tier 4   1,000,000 $POLLY
for 99 POL

Tier Sale Prices

Tier Sale includes

5480

slots

Each Tier has a fixed number of slots: 480, 600, 800, 1200, and 2400, respectively. The earlier you participate, the better the price per token!

	Token price	Slot price	Slots
Tier 1	$0.000025	176 POL	480
Tier 2	$0.00003	169 POL	600
Tier 3	$0.000035	148 POL	800
Tier 4	$0.000045	127 POL	1200
Tier 5	$0.00007	99 POL	2400

Tier Sale Partner Program

Tier sale stage offers a simple yet rewarding partner program with single-level bonuses. You'll earn 10% in $POLLY for every purchase made by your invited partners.
Here's how partner bonuses work:

Tier 1 +500,000 $POLLY	**Tier 2** +400,000 $POLLY	**Tier 3** +300,000 $POLLY

Tier 4 +200,000 $POLLY	**Tier 5** +100,000 $POLLY

Referral System

Polynetica features a robust partner bonus system that rewards users for referring new participants to the project.

Partner pool

A separate pool of 3% of the total token issuance (3 billion tokens) will be allocated for partner rewards.

Partner links

Users can generate partner links using their wallets.

Partner tracking

The system will track all tokens earned through partner links, including the wallet address of the partner, the amount of tokens earned, and the total earnings.

Anti-Fraud Measures

Signature-based authentication: A signature-based authentication system will be implemented to prevent fraud and bot use.

Additional Features

Token distribution

Tokens will be distributed on the Polygon blockchain.

Trading pair

The trading pair for $POLLY will be POLLY/POL.

Customizable slippage

Users will be able to customize the slippage during the public sale.

Perspectives on next page

Perspectives

$POLLY token will be used in all tools, programs and future developments as a utility token and as a reward for holders.

The token has all the potential to be listed on all top 10 CEX, and the team will do everything to make the token surpass $100 million Market Cap and have more than 100 thousand holders in the Polygon blockchain.

Conclusion

The Polynetica project offers a unique opportunity for users through its innovative tokenomics and referral system. The project's focus on transparency, security, and growth potential makes it an attractive business opportunity in the rapidly evolving blockchain landscape.
